# THE SIMPLE SIDE OF P.E. GUERIN

## SOME OF OUR OLDEST PATTERNS ARE THE SIMPLEST ONES.

P.E. Guerin is the oldest decorative hardware firm in the United States, and the only metal foundry in Manhattan. The company was started in 1857 by French immigrant Pierre Emmanuel Guerin and has been at its current location on Jane Street in Greenwich Village since 1892. Four generations later, the company remains a family business, now owned and directed by Pierre Emmanuel's great grandnephew, Andrew F. Ward.

P.E. Guerin's dedication to hand-crafted, quality hardware makes us ideal for residential, commercial, and hospitality projects. We are experts in door, plumbing, window, cabinet hardware and much more. Since our beginning, we have not limited our fine craftsmanship to highly ornate design. There has always been a call for simple material for utility and to balance out more ornate formal rooms. Our stock line was introduced in the 1950s as a means to meet a faster-paced market that still desired quality craftsmanship. Since that time, we have integrated many of the simpler designs from our historic Made-to-Order line into our stock program, and have continuously produced new work to match the design periods of the day, from Mid-century Modern to the present.

P.E. Guerin recently introduced its Special Order program, a selection of items in a wider variety of sizes and variations that is not kept in stock, but is offered at a competitive price and lead time in complementary designs to our stock program. These items are noted in the body of the catalog with an asterisk(\*). Made-to-order items are noted in the body of the catalog as well(§). Also noted are items that can be easily produced in custom sizes to your specifications(†). Lead time will be provided when quoting.

Collections presented here are a small and curated selection of our broad product line; they are by no means exhaustive and can be combined in any variations you desire. A more extensive listing is shown in the categories sections of this catalog, and is constantly updated and expanded on our website. If you don't see something you love from our thousands of products, let's design something new together.

We finish every piece to order, by hand, to your finish selection from our variety of fine patinated and plated finishes, here in New York City, and ship from our door to yours.

*"I think it's exciting to be able to keep my family's company going for as long as it has, operating in pretty much the same way for over 160 years. Keeping a hand-made product viable in this age of technology is incomprehensible to me."*

Andrew Ward  
President & C.E.O., P.E. Guerin

## ABOUT THIS CATALOG

This catalog presents simple and modern items from our stock product line, with select coordinating items from our special order and made to order lines where indicated. Our stock items are kept in stock in plain brass, and finished to order. Special order items are essentially ordered to order and then finished to your selection. Made-to-order items are made start to finish at our Jane Street foundry. All of our hardware is sold à la carte; curated collections are shown at the beginning of each section to suggest items that pair well together, but selections can be made from the categories sections as desired for your project. Our website works as an excellent companion to this catalog, where you can see expanded product information, print tearsheets, and save your selections to a list, from which you can conveniently request a quote.

P.E. Guerin is continually expanding its product offering; visit [peguerin.com](http://peguerin.com) to see what's new.

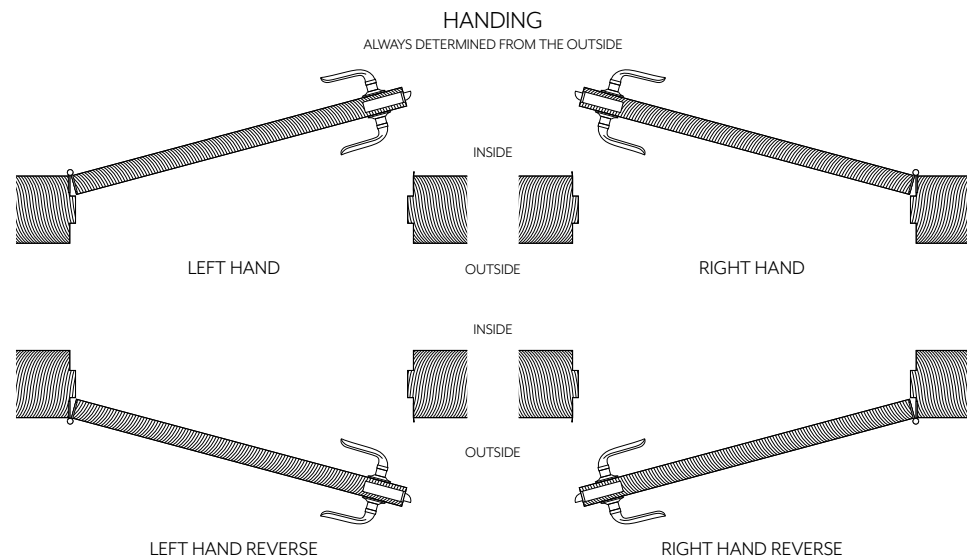

## HOW TO ORDER

We sell and ship our products from our New York City factory nationally and internationally. Call us at 212-243-5270 or email [info@peguerin.com](mailto:info@peguerin.com) for a quote. You can also create a list of products on our website and request a quote from there. A salesperson will guide you through your order to provide pricing, dimensions, and any other information you require. If you'd like to view our products in person, please make an appointment to visit our main location in New York City, or one of our representative showrooms near you.

For qualifying projects, P.E. Guerin can send a representative for a site visit to specify or assess an order. A non-refundable deposit, which will go towards your order, will be required. To view more imagery and specifications on any of our products, visit [peguerin.com](http://peguerin.com).

A 50% deposit is required to place an order; remainder due upon order completion prior to shipment. Minimum net order is \$100. Lead times vary depending on the scope of each project and will be advised as part of the quotation process. Lead times begin from the approval of the order.

Door handing, thickness, and material are needed to provide an accurate quote for door hardware; floor plans and corresponding door schedule preferred.

## SAMPLES

If you're unable to visit one of our showrooms, let us know what you're interested in and we can ship samples as needed for client presentations. Due to the scale of our product line, we cannot provide each item in every finish, but will accommodate requests as best we can, and in most cases will provide the product in plain brass with an accompanying finish sample.

## WARRANTY

All goods supplied by P.E. Guerin, Inc., are understood to be free from defects in material or workmanship. We will replace any defective merchandise returned to us within 30 days of delivery, but will not be liable for any labor, shipping or other costs involved with the sale, use or replacement of said material.

## TERMS OF DELIVERY

Prices are FOB 23 Jane Street, New York, NY, 10014 and are subject to change without notice. A deposit of 50% is required with each order. Estimated delivery time can be advised when order is approved but is not guaranteed other than in cases of rush orders.

## RETURNS

Prior written authorization from us is required before returns will be accepted and a copy of the authorization must accompany the merchandise. For standard stock polished brass no lacquer goods returned in perfect condition, there will be a handling and restocking charge of 40%. Made-to-order items, P/O lavatory bowls, merchandise past 60 days from shipping date and used materials will not be accepted for credit or refund. Any change-orders or cancellations following our acceptance of an order are subject to our agreement and to charges of no less than 25% for overhead.

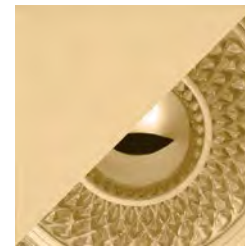

## DON'T SEE WHAT YOU'RE LOOKING FOR?

Our made-to-order line boasts an estimated 50,000 patterns - register on our website or contact us to view items from this expansive product offering. If you still don't see the perfect item for your project, P.E. Guerin has over 160 years of experience in producing custom work for our clients. We can make nearly anything in brass. Bring us your custom design in any form, from a napkin sketch to a 3D print, and we'll make your vision a reality. You can even come watch our artisans make it here in New York City.

Our products can be ordered in any of the following finishes, except where noted, or in a custom finish to your specifications. All of our finishes are produced by hand and may vary. We consider our finishes to be "living finishes," which will continue to age and deepen over time, and become highlighted where touched often. Where polished or brushed brass is exposed to heavy use, such as in the case of exterior hardware or plumbing fittings, it is strongly suggested that the surface not be lacquered but that it be maintained from the beginning with the regular use of a good commercial brass polish. Brass, bronze and silver finishes are not recommended for bathroom fittings and accessories, due to the constant polishing that is required for proper maintenance. We suggest gold, pewter, or nickel for their beauty and utility.

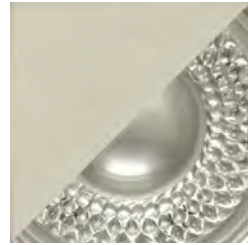

All non-brass finishes are plated over solid brass. While we believe the quality of our plating to be superior, no plated finish can be guaranteed. Its durability is in direct relationship to the quality of maintenance. All harsh chemicals and abrasives must be avoided. Cleaning should be done with mild soap and water and the surface should be buffed dry with a soft cloth. An occasional polishing with furniture oil or wax is helpful.

# M O D E R N R O U N D

Created by P.E. Guerin in what is now known as the Mid-Century Modern period, this collection pursues the essence of cylindrical and utilitarian forms. Its roots are firmly in the Bauhaus school which refrained from artistic embellishments that it saw as "useless" - preferring clean and simple geometric forms instead. This austere and essential offering lends itself to starkly modern interiors, as well as transitional projects where an expertly made yet purely simple detail will not take away from other elements of the design. This is by no means a comprehensive showing of our modern designs; many coordinating accessories can be seen in the hardware categories section of this catalog.

# F A C E T E E D

This rich and dazzling contemporary design celebrates a resurgence of essential geometric forms. Its roots are in neoclassicism but it is decidedly modern. Reminiscent of the Baguette Diamond made popular in the early 20th Century, its sparkling facets shine in polished finishes; the collection shows off its modern geometry in matte finishes such as Old Gold and Pewter.

# M E T R O D E C O

With streamlined, clean lines, this collection is modern yet pays homage to the period that has become known as Art Deco. These designs explore the linear quality and stoic nature of works by Hugh Ferriss and Erich Kettelhut. The simplest form of Deco, its elegant and balanced forms call to mind our city's greatest stepped landmark, the Empire State Building. Many coordinating designs are also available in other functions by request.

S T E P D E C O

P.E. Guerin's Step Deco collection was developed in our Jane Street workshop during the Art Deco period, simply known as "Modern" at the time. The bold, geometric, stepped forms of the era were derived from Egyptian and Mesoamerican architecture reimagined with an emphasis on verticality, and were also shaped by zoning regulations requiring skyscrapers to have setbacks as they soared to greater and greater heights. The collection lends itself to a quintessentially Art Deco interior as much as a sleek, modern interior in want of added visual interest.

# NUGGET

Inspired by Formalist sculptor Giacometti, this collection was created by Arthur C. Ward, P.E. Guerin's 3rd-generation president, in the 1950s. Perfectly suited for Brutalist-inspired interiors, which have seen a resurgence lately, this collection also offers a fun take on nature-inspired interiors. Favorite finishes for this suite include Antique Gold for a gold nugget look, and Antique Brass or Pewter for emulating stone.

S I M P L E

Our simple collection imparts a soft, clean, and comfortable aesthetic to any project. The smooth lines and contours are easy on the hands and eyes. This classically elegant collection harkens back to the utilitarian handmade hardware of the Colonial era used for service areas, storage units, and carrying trays. Our large pulls in this collection are often used for built-in refrigerators. As with all of our collections, this is a curated selection of our simple designs and many more complementary items can be found in the hardware categories pages.

C O V E

Romantic and well-defined, the curves of our cove collection are sophisticated yet modern. The cusped edges catch the eye while the contours are smooth on the hand. This perfectly transitional collection is well-suited to any interior.

C L A S S I C O G E E

Our Classic Ogee collection is visually stunning. An exploration of the simplest forms of traditional Georgian design, this suite plays with ogees and contours to create just the right amount of detail for your project. Choose between slender and sleek, wide and stately, or elegant and oval. These products also pair well with many of the items from our Georgian collection, with any other design of your choosing from our broad product line, or with a custom design of your own.

B E A D E D

Our Beaded collection offers just the right amount of ornamentation when you want a little something extra for your project. This suite brings simplicity with a touch of detail. Initially seen as additional ornamentation on highly ornate French hardware, beading has come into its own in this Georgian collection. Often called pearl moulding, this detail sparkles in polished finishes and glows in matte finishes as it breaks up the light. This detailing can be added by request to many of our other designs.

K N U R L E D

A celebration of refined craftsmanship, hand-lathed knurling takes our Georgian collection to the next level. This subtle detail catches the eye and creates a visually rich surface that responds well to patinated finishes and shines in polished finishes. Knurling can be added to many of our other products by request.

 N° 75646 - 1 ¼"

# M U L T I - K N U R L E D

The fine bands of knurling in this collection produce a highly contrasted and visually rich surface. The classically refined rope motif can lend itself to more nautical, industrial, or classical interiors depending on finish and context. When working with a simple scheme, this collection adds a subtly rich detail. This design can be found in our earliest pattern books, but has never fallen out of favor. These products can be paired with any of our knurled items, and knurled detailing can be added to many of our designs.

# O C T A G O N A L

This sophisticated octagonal geometry has roots in classicism, but was popularized in the United States during the Greek Revival period by Thomas Jefferson in his designs for Poplar Forest and Monticello. Its timeless elegance can lend an air of refinement to strictly modern projects and authority to more traditional projects. A well-tailored and masculine design, this collection pairs well with dramatic millwork and bold color choices.

B A U H A U S

Created in the true tradition of the Bauhaus school, this collection offers timeless modernity and clean simplicity. Bauhaus - literally "construction house" - celebrated abstract, pure, geometric, and utilitarian design. This collection explores the essence of every need our hardware seeks to serve: form follows function. Bauhaus designers saw decoration to be useless - and while that's not P.E. Guerin's philosophy- there is an enduring beauty to this collection.

# 1 6 0 T H A N N I V E R S A R Y

This Mid-century collection was designed around its sleek cross handle, found in the P.E. Guerin pattern room. The designs were launched as a commemorative collection for the company's 160th anniversary, to highlight our work in modern styles from the dawn of the Bauhaus movement in the 1920s through today, 100 years later.

B E E H I V E

The Beehive collection was designed by P.E. Guerin's 4th-generation president, Andrew F. Ward. With a nod to the Deco heritage of the 1930s, the simple beauty of smooth surfaces accentuated by a repetition of form results in a distinctly contemporary bath collection. The bold steps of this collection pair well with any scheme, from a sharply monochromatic powder room to a lavishly wallpapered bath.

G E A R

This collection brings together cog and engine-turned details to create an elevated and visually rich Machine Age design. Well-suited for industrial chic interiors, this suite is also intriguing when contrasted with luxury materials such as fine marble and semi-precious stone. Many notable designers have turned to P.E. Guerin's Gear collection in recent years as a way to introduce modern fixtures into their projects that are anything but boring.

N U G G E T

Inspired by Formalist sculptor Giacometti, this collection was created by Arthur C. Ward, P.E. Guerin's 3rd-generation president, in the 1950s. Perfectly suited for Brutalist-inspired architecture, which has seen a resurgence lately, this collection also offers a fun take on nature-inspired interiors. Favorite finishes for this suite include Antique Gold for a gold nugget look and Antique Brass or Pewter for emulating stone.

D E K K O

Inspired by Deco lines merged with a Mid-Century sensibility, the Dekko collection offers a bold take on traditional forms. The spare, strong lines coordinate well with transitional through modern interiors. The sculptural cross handles and sweeping steps grab the eye - and while "dekko" is British slang for a quick glance, this collection will have you looking a lot longer.

# C L U B M A N

The Clubman collection calls to mind the dark wood, leather, and smoke-filled rooms of the great clubs of the past and present. The masculine, clean lines of the cross handles and subtle curves of the accessories are perfect for any interior needing a dash of bold contrast. P.E. Guerin can supply a wide variety of inserts such as rock crystal, citrine, amethyst, onyx, lapis lazuli, malachite, and nearly any other semiprecious material, stone, or wood to take your project to the next level.

Finely detailed, delicate, and sophisticated, our Beaded bath collection brings elegance to any bathroom. The beaded moulding detail, also known as pearling, is dazzling in polished finishes and stately in matte finishes. This Georgian collection offers simplicity with just the right amount of embellishment.

R E E D & B E A D

This visually stimulating collection is a contemporary take on traditional English reeded and melon forms. The undulating design plays with light and shadow to bring a sculptural element to your project without being overly ornate. This suite easily coordinates with simple millwork details and other beaded decorative motifs.

# A N N I V E R S A R Y

This tailored take on traditional octagonal geometry creates a prismatic effect that reflects light beautifully. With origins in the Greek Revival period in the United States, this collection goes hand-in-hand with our Octagonal door hardware collection for the perfect union of decorative and functional elements in your decor. For a traditional look, this collection is stunning in Antique Brass, and for a modern interpretation, it shines in Polished Nickel.

# M O N T I C E L L O

P.E. Guerin's Monticello collection offers a more Jeffersonian take on classic octagonal forms. The beautifully geometric knobs create a dome from segmented ogival curves like that of its namesake at Monticello. The octagon fascinated Jefferson as both a unifying architectural form and as a symbol of renewal, rebirth and transition, and this collection can bring new life to simple, elegant interiors.
